

100 câu hỏi trắc nghiệm Infotech: Từ vựng

Unit 1

1. The program which is used for text manipulation is called_____
a. database b. spreadsheet c. word processor d. virtual reality
2. Copying a file from a server to your PC or mobile is called_____
a. downloading b. downsizing c. uploading d. upsizing
3. Skype is a technology that enables you to_____over the internet.
a. transfer money b.do research c. give presentations d. make calls
4. Cookies allow a website to_____on a user's machine and later retrieve when you can visit the website.
a. transfer money b. store information c. give presentations d. make calls
5. Online banking lets you_____between your accounts easily and securely.
a. transfer money b. store information c. give presentations d. make calls
6. With the latest mobile phones, you can_____with multimedia attachments - pictures, audio, and even video.
a. transfer money b. store information c. send texts d. access the database

Unit 2: computer parts

- 7._____is any electronic or mechanical part you can see or touch.
a. hardware b. software c. CPU d. peripherals
- 8._____is a set of instructions which tells the computer what to do.
a. hardware b. software c. CPU d. peripherals
- 9._____is called the "brain" of the computer.
a. hardware b. software c. CPU d. peripherals
- 10._____are the physical units attached to the computer.
a. hardware b. software c. CPU d. peripheral

23. Which multi-user OS is a open-source software developed under the GNU General Public License.

- a. Windows b. Mac OS c. Unix d. Linux

24. Which is NOT a characteristic of GUI?

- a. user-friendly b. slow c. graphic-based d. intuitive

25. The_____icon lets you change the way your lapt

- a. folder b. screen saver c. display d. save

Unit 5: spreadsheet and database

26. In a spreadsheet, each_____is labelled with a letter.

- a. column b. row c. cell d. worksheet

27._____is a unit of a database file made up of related fields.

Remember in database: field – Record – File (a group of records is called a file)

- a. field b. file c. record d. database

28._____is a single piece of information in a record.

- a. field b. file c. record d. database

29. A tool that allows you to extract information that meets certain criteria is_____

- a. query b. sort c. record d. database

30. Modern databases are_____ - that is, they are made up of related files._

- a. relate b. relation c. relational d. relationship

31. To_____is to classify records into numerical or alphabetical order.

- a. search b. sort c. query d. update

32 .To_____is to look for specific information, for example, the name of an employee.

- a. search b. sort c. query d. update

Unit 6

33. Which term describes any fast, high bandwidth connection?

- a. broadband b. dial-up connection c. wi-fi connection

34. The power-line Internet provides broadband access through_____

- a. telephone lines b. satellites c. electrical power lines

35. Which device converts computer data into a form that can be transmitted over phone lines.

- a. ADSL b. a mobile phone c. a modem

36. The standard protocol that allows computers to communicate over the internet is called_____

- a. an IP address b. TCP/IP c. HTTP

37. The geographical region covered by one or several access points is called_____

- a. wireless access point b. hotspot c. wireless network device

38. An_____is a company that offers connection for a monthly fee.

- a. ADSL b. ISP c. IP

39. If you want to connect lots of computers without using cables, you can use a_____router.

- a. wifi b. wireless c. wire

40. You use_____if you want to take part in public discussion areas devoted to specific areas.

- a. Chat and IM (instant messaging) b. Telnet c. newsgroups

41. You use_____if you want to have a live conversation (usually typed) online.

- a. Chat and IM b. Telnet c. newsgroups

42. You use_____if you want to connect to a remote computer by entering instructions and running a program on it.

- a. Chat and IM b. Telnet c. newsgroups

43. _____is a system to distribute email to many different subscribers at once.

- a. web browser b. news reader c. mailing list

44. _____is a program for reading Usenet newsgroups.

- a. Chat and IM b. Telnet c. newsreader

45. _____is a program for displaying web pages.

- a. Chat and IM b. Telnet c. web browser

46. Your ISP stores your emails on the_____

- a. web browser b. spam c. mail server

47. You can make your messages more expressive by using_____or emoticons.

a. smiles b. smilings c. smileys

48. The computer file which is sent along with an email message is called_____

a. attachment b. subject c. signature file

49. The line that describes the content of an email is called_____

a. attachment b. subject c. signature file

50. The part of an email address that identifies the user of the service is called_____

a. username b. password c. domain name

Unit 7

51. This highly_____game will keep you playing for hours.

a. addict(v,n) b. addiction(n) c. addictive(adj)

52. This software may not be fully_____adj_____with older operating systems.

a. compatible b. suitable c. fit

53. Companies are starting to use virtual_____on their websites

a. real b. really C. reality

54._____can be used on some websites instead of real money to make purchases.

a. e-cash b. e-money c. cyber-money

a. freeware b. malware c. spyware

58. A _____ is a type of software which is available free of charge but protected by copyright.
- a. freeware b. malware c. spyware
59. _____ is a program designed to damage your computer.
- a. freeware b. malware c. spyware
60. A _____ is a self-copying program that spread through email attachments.
- a. virus b. worm c. spyware
61. A _____ is disguised as a useful program.
- a. trojan b. worm c. virus
62. Encoding data so that unauthorized users cannot read it is known as _____
- a. encryption b. decryption c. firewall
63. A _____ can enter a PC via a disc drive.
- a. virus b. worm c. spyware

Unit 9

64. In graphics programs, _____ means moving an object to a different location.
- a. translating (di chuyển) b. rotating (xoay) c. scaling up/down (phóng to, thu nhỏ)
65. In graphics programs, _____ means turning the object around an axis.
- a. translating b. rotating c. scaling
66. In graphics programs, _____ means making objects larger or smaller.
- a. translating b. rotating c. scaling
67. In the Photoshop toolbox, you click on the _____ to cut down the dimensions of a picture.
- a. move tool b. crop tool c. type tool
68. In the Photoshop toolbox, you click on the _____ to fill in an area with a colour.

a. colour picker b. colour tools and palette c. paint bucket

69. Popular formats of _____ are JPEG, GIF, TIFF.

a. vector graphics b. raster graphics c. GIS

- basic shapes: lines, curves .. - pixels

- not jagged-good quality - jagged edges

- not natural colour - natural colour

EPS

.JPEG, GIF, TIFF

70. _____ use geometric objects based on mathematical equations.

a. vector graphics b. raster graphics c. GIS

71. _____ Can be changed or scaled without losing quality.

a. vector graphics b. raster graphics c. GIS

72. One of the disadvantages of _____ is that when texts or pictures that are scaled up may show jagged edges.

a. vector graphics b. raster graphics c. GIS

73. _____ are stored as a collection of pixels. The sharpness of an image depends on the resolution.

a. vector graphics b. raster graphics c. GIS

74. _____ means showing the outline of all edges in a transparent drawing.

Remember: 4 steps to design a drawing

a. Wireframe (phác thảo) b. solid modeling (3D) c. texturing (paint, color) d. rendering (shadow, highlight)

75. _____ means specifying and fill the surface to give a 3-D solid object

a. Wireframe b. solid modeling c. texturing d. rendering

76. _____ means adding paint and colour and filters to achieve the desire 'look and feel'

a. Wireframe b. solid modeling c. texturing d. rendering

77. _____ means making the object look real by using lighting and shading and effects to simulate shadows and reflections.

- a. Wireframe b. solid modeling c. texturing d. rendering

78. _____ combining parts of different images to create a single image.

- a. CAD b. animation c. compositing

79. The basic shapes which are used to make graphical objects are called _____.

- a. attributes b. primitives c. fractals

80. The number of pixels in an image is called _____

- a. resolution b. fractal c. primitive

Unit 10

81. As long as your computer has a _____ you can use it to capture sounds in digital format and play them back.

- a. CD ripper b. webcast c. sound card

82. _____ is a program that extracts music tracks and saves them on disks as MP3s

- a. CD ripper b. webcast c. sound card

83. The broadcast of an event over the web is called a _____.

- a. CD ripper b. webcast c. sound card

84. Sound cards offer two capabilities: a built-in stereo synthesizer and a system called _____ which allows electronic musical instruments to communicate with computers.

- a. MIDI b. DAW c. video computing.

85. A _____ (DAW) lets you mix and record several tracks of digital audio.

- a. MIDI b. DAW c. video computing.

86. _____ refers to recording, manipulating and storing video in digital format.

- a. MIDI b. DAW c. video computing.

87. _____ is a form of enriched media which allows an interactive and dynamic linking of visual and audio elements.

- a. hyperlink b. hypertext c. hypermedia

88. _____ is a technique for playing sound and video files while they're downloading.

- a. streaming b. video computing c. video editing

Unit 11

89. The only language that computers can understand directly is _____

Remember: machine code: máy tính hiểu; compiler=interpreter: trình biên/ phiên dịch; High-level language: ngôn ngữ lập trình

- a. symbolic language b. assembly language c. machine code d. high-level language

90. Which markup language enables us to define our own tags, not limited by a fixed set of tags.

- a. HTML (limited tags) b. XML (unlimited tags) c. Voice XML (voice)

91. Which markup language allows us to describe how information will be displayed in web pages.

- a. HTML b. XML c. Voice XMI

92. Which markup language makes Web content accessible via voice and phone.

- a. HTML b. XML c. Voice XMI

93. _____ was the first high level language in data processing.

- a. FORTRAN b. JAVA c. COBOL

94. This high-level language is widely used in the business community

- a. FORTRAN b. JAVA c. COBOL

95. This high-level language is used in universities to teach the fundamentals of programming.

- a. BASIC b. PASCAL c. C

96. This high-level language provides animation and interactive features on web pages.

- a. JAVA b. C c. C++

97. _____ is a special program which converts the source program into machine code.

- a. compiler b. debugger c. assembler

98. _____ is the technique of detecting and correcting errors which may occur in programs.

- a. compiling b. debugging c. assembling

Remember: debugger(N): chương trình, debugging(n), bug (N)

99. _____ is the process of writing a program using a computer language.

- a. program(N,V) b. programming(N) c. programmer(N)

100. Programmers usually _____ their programs to generate an object program and diagnose possible answers.

- a. compile(V) b. compiler(N) c. compiling (N)
